

Setting Sail for a Greener Future with Renewable Energy Skills for all

PROGRESSING WITH RESOURCES

Project Number: 2024-1-FR01-KA220-VET-000251591

WHAT'S NEW?

Upgrading from two comprehensive curricula to 12 Thematic modules and 7 Teaching Toolkit Modules was our working process in last half a year! Partners also held on-line Training of Trainers, where comprehensive curricula and teaching toolkit was presented. We had a great discussion with the participant and got some valuable feedback. Not to mention digital learning platform! It is in the final stage of preparation. Piloting of the platform is scheduled for early July, as it is production of Study Visits. In the last month of the project, August, each country will host Multiplier event, which can not be missed, for sure.

1. Thematic Modules

In thematic modules partners provided some resources and learning material for the learners. The material is suitable for those learners, who are interested in green entrepreneurship, renewable energy, sustainability, and gender equality in the green sector.

2. Teaching Toolkit Modules

Teaching Toolkit is meant for trainers. In the toolkit modules trainers can get free material for their lectures. The material is developed for EQF level 4, but it is easy adaptable for every other EQF level, even kindergarten.

3. Study Visits

If you want to watch some inspiring stories about entrepreneurs in green sector, we invite you to have a look at our Study Visits. There is a video from each country about one or more persons that are successful in green sector and will share their success story with you. Maybe you can get inspired and become entrepreneur yourself!

The next step in our project is already underway!

Visit our website to discover videos about Study Visits!

Enrol in our training course and upgrade your knowledge!
