

Setting Sail for a Greener Future with Renewable Energy Skills for all

THE PROJECT HAS COME TO AN END

Project Number: 2024-1-FR01-KA220-VET-000251591

WHAT'S NEW?

In late July and early August the pilot testings of the GreenerShip Education Curriculum, Gender Equality in the Green Sector Curriculum, Green Entrepreneurship Teaching Toolkit, Thematic Modules for Green Entrepreneurial Skills and Virtual Study Visits were started.

1. Pilot tests

In pilot test partners got feedback from VET students / trainees, VET trainers / educators, green sector professionals, organisation / stakeholder representatives and entrepreneurs in green sector about the curriculum models, toolkit and thematic modules.

In general we can say that the participants were very satisfied with the quality of the toolkit, appreciated case studies and practical exercises on green business and liked virtual study visits.

2. Multiplier events

Multiplier events were hosted in all four countries of the project. Participants showed interest in the platform, curriculum and platform. They stated that the platform is easy to use, flexible in terms of remote and anytime access and that the content can be widely used.

Participants also indicated that they consider using platform for training new trainers and developing their own professional skills.

3. Study visits

In the study visits partners presented inspiring stories of ecological farmer, a company providing digital solutions and services to help businesses optimise waste management, project manager for green skills and sustainability projects, company supporting transition to sustainable and resilient agriculture and company supporting businesses with their waste management.

The project time is over, but the project itself stays!
